[Mao's Children in the New China](#) Feb 17 2022 Around 18 million young Chinese people were sent to the countryside between 1966 and 1976 as part of the Cultural Revolution. Mao's Children in the New China allows some of them to tell their moving stories in their own voices for the first time. In this inspiring collection of interviews with former Red Guards, members of the first generation to be born under Chairman Mao talk frankly about the dramatic changes which have occurred in China over the last two decades. In discussing the impact these changes have had on their own lives, the former revolutionaries give a direct insight into how ex-Maoists view contemporary China, revealing an attitude perhaps more critical than that of most Western commentators. These poignant memoirs tell the very personal stories of how people from all walks of life were affected by both the cultural revolution and Deng Xiaoping's economic reforms. They cover subjects as diverse as marriage and divorce, the privatization of industry, family relationships, universities and the stock market. Mao's Children in the New China is essential reading for all those interested in learning more about the personal and social history of modern China.

[Selections from the Recently Published Correspondence Between Louis-Claude de Saint-Martin, Dit Le "Philosophe Inconnu" and Kirchner, Baron de Liebstorf...](#) Aug 11 2021 [Archaeology of the Russian Far East](#) Feb 23 2020 The archaeology of the Russian Far East is rich in new and sometimes surprising discoveries. Very early pottery dates, in several locations, are perhaps the most important and interesting of these finds. Connections with other parts of the Far East are also established in these new studies. The chapters that follow in this regional synthesis elaborate these themes. Arranged in chronological order and by region, each is written by a specialist who has participated in some or all of the archaeological expeditions reported here. The chapters are replete with archaeological details, allowing the reader to judge the interpretations independently. Illustrations and maps add to the information provided. They show not just the unanticipated richness of the archaeology of the Russian Far East but, more important, the contributions these sites can make to the archaeology of the region and of the world.

[Survey of Current Business](#) Oct 01 2020 [International Arbitration: Law and Practice in Switzerland](#) Sep 12 2021 This book expounds the theory of international arbitration law. It explains in easily accessible terms all the fundamentals of arbitration, from separability of the arbitration agreement to competence-competence over procedural autonomy, finality of the award, and many other concepts. It does so with a focus on international arbitration law and jurisprudence in Switzerland, a global leader in the field. With a broader reach than a commentary of Chapter 12 of the Swiss Private International Law Act, the discussion contains numerous references to comparative law and its developments in addition to an extensive review of the practice of international tribunals. Written by two well-known specialists - Professor Kaufmann-Kohler being one of the leading arbitrators worldwide and Professor Rigozzi one of the foremost experts in sports arbitration - the work reflects many years of experience in managing arbitral proceedings involving commercial, investment, and sports disputes. This expertise is the basis for the solutions proposed to resolve the many practical issues that may arise in the course of an arbitration. It also informs the discussion of the arbitration rules addressed in the book, from the ICC Arbitration Rules to the Swiss Rules of International Arbitration, the CAS Code, and the UNCITRAL Rules. While the book covers commercial and sports arbitrations primarily, it also applies to investment arbitrations conducted under rules other than the ICSID framework.
