**Victorian Scientific Naturalism** Mar 06 2021 Victorian Scientific Naturalism examines the secular creeds of the generation of intellectuals who, in the wake of *The Origin of Species*, wrested cultural authority from the old Anglican establishment while installing themselves as a new professional scientific elite. These scientific naturalists—led by biologists, physicists, and mathematicians such as William Kingdon Clifford, Joseph Dalton Hooker, Thomas Henry Huxley, and John Tyndall—sought to persuade both the state and the public that scientists, not theologians, should be granted cultural authority, since their expertise gave them special insight into society, politics, and even ethics. In *Victorian Scientific Naturalism*, Gowan Dawson and Bernard Lightman bring together new essays by leading historians of science and literary critics that recall these scientific naturalists, in light of recent scholarship that has tended to sideline them, and that reevaluate their place in the broader landscape of nineteenth-century Britain. Ranging in topic from daring climbing expeditions in the Alps to the maintenance of aristocratic protocols of conduct at Kew Gardens, these essays offer a series of new perspectives on Victorian scientific naturalism—as well as its subsequent incarnations in the early twentieth century—that together provide an innovative understanding of the movement centering on the issues of community, identity, and continuity.

The knowledge required for the exam is integrated with practical exam tips and advice to make revision easier and more effective. - Consolidates revision with all key information in one place - Ensures pupils have covered everything with the handy revision checklist - 'Test yourself' exercises identify areas requiring further study - Suitable for ISEB 13+ Science Common Entrance exams taken from Autumn 2017 onwards Also available to purchase from the Galore Park website [www.galorepark.co.uk](http://www.galorepark.co.uk): - Science for Common Entrance 13+ Exam Practice Answers - Science for Common Entrance 13+ Exam Practice Questions - Science for Common Entrance: Biology - Science for Common Entrance: Biology Answers - Science for Common Entrance: Chemistry - Science for Common Entrance: Chemistry Answers - Science for Common Entrance: Physics - Science for Common Entrance: Physics Answers

**A Scientific Way of War** Sep 12 2021 While faith in the Enlightenment was waning elsewhere by 1850, at the United States Military Academy at West Point and in the minds of academy graduates serving throughout the country Enlightenment thinking persisted, asserting that war was governable by a grand theory accessible through the study of military science. Officers of the regular army and instructors at the military academy and their political superiors all believed strongly in the possibility of acquiring a perfect knowledge of war through the proper curriculum. *A Scientific Way of War* analyzes how the doctrine of military science evolved from teaching specific Napoleonic applications to embracing subjects that were useful for war in North America. Drawing from a wide array of materials, Ian C. Hope refutes earlier charges of a lack of professionalization in the antebellum American army and an overreliance on the teachings of Swiss military theorist Antoine de Jomini. Instead, Hope shows that inculcation in West Point's American military curriculum eventually came to provide the army with an officer corps that shared a common doctrine and common skill in military problem solving. The proliferation of military science ensured that on the eve of the Civil War there existed a distinctly American, and scientific, way of war.

**Objective Life Science 4Ed : MCQs for Life Science Examination (CSIR, DBT, ICAR, ICMR, ASRB, IARI, SET & NET)** Jan 24 2020

The idea of the book entitled "Objective Life Science: MCQs for Life Science Examination" was born because of the lack of any comprehensive book covering all the aspects of various entry level life science competitive examinations in particular conducted by CSIR, DBT, ICAR, ICMR, ASRB, IARI, State and National Eligibility Test, but not limited to. This book, covers all the subjects of life science under 13 section namely, 1.

Molecules and their interaction relevant to biology; 2. Cellular organization; 3. Fundamental processes; 4. Cell communication and cell signaling; 5. Developmental biology; 6. System physiology – Plant; 7. System physiology – Animal; 8. Inheritance biology; 9. Diversity of life forms; 10. Ecological principles; 11. Evolution and behavior; 12. Applied biology and 13.

Methods in biology. Each Section has been further divided into two parts with 200 short tricky questions and 100 applied conceptual questions. The ultimate purpose of this book is to equip the reader with brainstorming challenges and solution for life science and applied aspect examinations. It contains predigested information on all the academic subject of life science for good understanding, assimilation, self-evaluation, and reproducibility.
