Right here, we have countless ebook War And Rape Interventions and collections to check out. We additionally provide variant types and furthermore type of the books to browse. The good enough book, fiction, history, novel, scientific research, as competently as various new sorts of books are readily simple here.

As this War And Rape Interventions, it ends going on visceral one of the favored ebook War And Rape Interventions collections that we have. This is why you remain in the best website to look the unbelievable ebook to have.

Violence in Families Apr 26 2020 Reports of mistreated children, domestic violence, and abuse of elderly persons continue to strain the capacity of police, courts, social services agencies, and medical centers. At the same time, myriad treatment and prevention programs are providing services to victims and offenders. Although limited research knowledge exists regarding the effectiveness of these programs, such information is often scattered, inaccessible, and difficult to obtain. Violence in Families takes the first hard look at the successes and failures of family violence interventions. It offers recommendations to guide services, programs, policy, and research on victim support and assistance, treatments and penalties for offenders, and law enforcement. Included is an analysis of more than 100 evaluation studies on the outcomes of different kinds of programs and services. Violence in Families provides the most comprehensive review on the topic to date. It explores the scope and complexity of family violence, including identification of the multiple types of victims and offenders, who require different approaches to intervention. The book outlines new strategies that offer promising approaches for service providers and researchers and for improving the evaluation of prevention and treatment services. Violence in Families discusses issues that underlie all types of family violence, such as the tension between family support and the protection of children, risk factors that contribute to violent behavior in families, and the balance between family privacy and community interventions. The core of the book is a research-based review of interventions used in three institutional sectors—social services, health, and law enforcement settings—and how to measure their effectiveness in combating maltreatment of children, domestic violence, and abuse of the elderly. Among the questions explored by the committee: Does the child protective services system work? Does the threat of arrest deter batterers? The volume discusses the strength of the evidence and highlights emerging links among interventions in different institutional settings. Thorough, readable, and well organized, Violence in Families synthesizes what is known and outlines what needs to be discovered. This volume will be of great interest to policymakers, social services providers, health care professionals, police and court officials, victim advocates, researchers, and concerned individuals.

Providing Direct Counter-arguments to Challenge Male Audiences' Attitudes Toward Rape Feb 23 2020

Treating the Trauma of Rape Oct 13 2021 After reviewing the relevant treatment literature, the authors detail how to assess and treat PTSD using a cognitive-behavioral approach. Complete instructions are given for planning treatment, as well as for introducing the patient to the various interventions. Nine exposure and stress management techniques are then detailed, including imaginal exposure (trauma reliving), in vivo exposure, relaxation training, thought-stopping, cognitive restructuring, covert modeling, and role-play. Enhancing the book's clinical utility are numerous case examples illustrating how to implement the techniques, as well as explanations of how to cope with common problems and complications in treatment. The final chapter presents detailed outlines of three suggested treatment programs.

Transition to Outcomes-based Evaluation, Rape Crisis Intervention Jun 28 2020

Communications and Technology for Violence Prevention Oct 21 2019 In the last 25 years, a major shift has occurred in the field of violence prevention, from the assumption that violence is inevitable to the realization that violence is preventable. As we learn more about what works to reduce violence, the challenge facing those who work in the field is how to use all of this new information to rapidly deploy or enhance new programs. At the same time, new communications technologies and distribution channels have altered traditional means of communications, and have made community-based efforts to prevent violence possible by making information readily available. How can these new technologies be successfully applied to the field of violence prevention? On December 8-9, 2011, the IOM's Forum on Global Violence Prevention held a workshop to explore the intersection of violence prevention and information and communications technology. The workshop - called "mPreventViolence" - provided an opportunity for practitioners to engage in new and innovative thinking concerning these two fields with the goal of bridging gaps in language, processes, and mechanisms. The workshop focused on exploring the potential applications of technology to violence prevention, drawing on experience in development, health, and the social sector as well as from industry and the private sector. Communication and Technology for Violence Prevention: Workshop Summary is the report that fully explains this workshop.

Domestic Violence Jul 18 2019 Domestic violence does not begin the day an adult heterosexual male decides to beat and batter an adult heterosexual female. Domestic violence is a complicated and multifaceted enigma that includes child, sibling, spousal, intimate partner, and elder abuse. Despite spending billions of dollars on domestic violence, the number of some categories of victims remains the same. The problem can be traced back to our very definitions of victim and abuse. Until we open our eyes to the blatant empirical evidence and come to some agreement on a basic platform, this pervasive crime will not diminish. Domestic Violence: Intervention, Prevention, Policies, and Solutions presents a rational and reasoned perspective that emphasizes evidence-based information rather than ideologically held beliefs. It challenges the effectiveness of existing policies and procedures and introduces 10 recommendations for change. The book summarizes many important federally sponsored reports and provides unique meta-analysis styled empirically based overviews of contemporary research and intervention efforts. It also supplies print and web-based national and state specific resources and references to studies and organizations that will be updated online. Topics addressed include historical and current explanations of battering behavior, the importance of the accurate and unbiased identification of victims, differences and the implications of those differences in reporting rape and sexual assault, and the understanding of risk factors. It considers the fallacy of ideological advocacy and presents legislation and policies in Colorado and California as cases in point. In particular the author explores the prevailing notion of the predominance of female victimization over male victimization. Injecting a voice of reason into a highly emotional debate, this outstanding volume clarifies our convenient delusions and allows us to re-appraise this sensitive issue and effect a positive and progressive outcome.

The Rape Victim Sep 24 2022 Rape—it's an all-too-familiar event in many women's lives. But what is being done to prevent its occurrence? How do victims deal with the trauma of rape? How are local agencies dealing with the increase of victims? How effective are available treatment programs? From the causes of rape to its lingering effects, from disclosure to treatment, The Rape Victim offers the most complete examination to date on this most heinous crime. The authors address the trauma of rape, prevention, rape as a community issue, rape crisis centers, date rape, clinical treatment of rape victims, and group treatment for survivors. Psychologists, mental health professionals, social workers, criminologists, nurses, and counselors will benefit from the wealth of information contained in this impressive volume. "Particularly recommended as supplemental reading for college programs on women's and social issues." --The Midwest Book Review "Excellent on incidence of rape, why federal statistics are flawed, the impact of rape on the victim, how society responds, how rape crisis centers evolved, offers empowerment and the best model for change, and how to lessen the trauma of rape. Techniques for therapeutic treatment are discussed including group treatment for survivors." --The Women's Advocate

The Rape Crisis Intervention Handbook Jul 22 2022 This handbook is intended to be a comprehensive resource for those involved in providing crisis intervention to rape victims. The medical, legal, and counseling needs of the rape victim are presented to prepare helping professionals to offer sensitive and skillful assistance to women who have suffered sexual assault. The interdisciplinary thrust of the book reflects our conviction that health professionals, police, and prosecuting attorneys must share their expertise and coordinate their efforts in order to successfully meet the multiple needs of rape victims and their families. While an extensive literature on rape has developed in the past decade, to the best of our knowledge there is no single source for the practical treatment-oriented information sought by those who work directly with victims. The primary objective of this book is to offer just such a guide to service providers. The book is organized into sections that deal with a specific area of the treatment of victims. Detailed guidelines are provided for the nursing, medical, counseling, police, and legal services involved in comprehensive crisis intervention. Interdisciplinary teaming and the emotional impact of rape on service providers are discussed by authors actively involved in rape crisis work. Rape laws are explained and court preparation for victim-witnesses is carefully outlined. Of particular relevance to counselors is an overview of crisis theory and a psychodynamic perspective on rape trauma.

Oxford Textbook of Violence Prevention Jul 30 2020 'Oxford Textbook of Violence Prevention' brings together an international team of experts to provide an extensive global account of the global mortality and morbidity burden caused by violence through examining the causes of violence, and what can be done to prevent and reduce violence.

Stopping rape Nov 02 2020 Available Open Access under CC-BY-NC licence. The need to stop rape is pressing and, since it is the outcome of a wide range of practices and institutions in society, so too must the policies be to stop it. This important book offers a comprehensive guide to the international policies developed to stop rape, together with case study examples on how they work. The book engages with the law and criminal justice system, health services, specialised services for victim-survivors, educational and cultural interventions, as well as how they can best be coordinated. It is informed by theory and evidence drawn from scholarship and practice from around the world. The book will be of interest to a global readership of students, practitioners and policy makers as well as anyone who wants to know how rape can be stopped.

Engaging Boys and Men in Sexual Assault Prevention Sep 12 2021 Engaging Boys and Men in Sexual Assault Prevention: Theory, Research and Practice explores sexual assault prevention programs for boys and men. Following an ecosystemic perspective, the book examines individual risk and protective factors, discusses initiatives to prevent sexual aggression (i.e., bystander intervention programs, given their use among men), covers programs that specifically seek to engage boys and men in sexual assault prevention, presents key risk and protective factors for sexual aggression (i.e., healthy masculinity, rape myth acceptance), and describes the need and rationale for sexual assault prevention efforts. Addresses current challenges and controversies in the field of sexual assault prevention Explores existing individual-level workshops and media-based interventions that address men's violence against women Reviews the association between traditional masculine norms and sexual violence perpetration Discusses international sexual assault prevention programs that engage boys and men Highlight how aspects of hypermasculinity strongly correlate with sexual aggression Provides an overview of research that examines risk factors for sexual aggression Synthesizes the conceptualization of rape myths, current assessments of rape myths, and examines how rape myths function as a risk factor for perpetration

Trauma Interventions in War and Peace Dec 03 2020 With traumatic stress an increasing global challenge, the U.N., the NGO community and governments must take into account the psychological aftermath of large-scale catastrophes and individual or group violence. Trauma Interventions in War and Peace is a volume created to address this global perspective, and as such it provides a conceptual framework for interventions in the wake of abuse, torture, war, and disaster on individual, local, regional, and international levels. To be useful to both practitioners and policy makers, the book identifies model programs that can be implemented at every level. These programs vary in target and intensity to include social policy, safety programs, public education, coordination, capacity building, training, self-help, counseling, and clinical intervention. A core group of chapters covers the general concepts of traumatic stress, intervention, and social deprivation, while others focus on specific traumatic events like refugees and child abuse in peacetime, each addressing the scope of the problem, reactions to the traumatic stressor, intervention issues, and recommendations. One whole chapter is devoted to caregiver reactions. Special features of the book are the integration of cultural, gender, poverty, and marginalization issues into each discussion, as well as the contributions of internationally noted academic and professional experts. U.N. and NGO personnel provided input and feedback on each chapter to provide the best working guidelines available for those responding to trauma around the world.

Gender and PTSD Oct 01 2020 Current research and clinical observations suggest pronounced gender-based differences in the ways people respond to traumatic events. Most notably, women evidence twice the rate of PTSD as men following traumatic exposure. This important volume brings together leading clinical scientists to analyze the current state of knowledge on gender and PTSD. Cogent findings are presented on gender-based differences and influences in such areas as trauma exposure, risk factors, cognitive and physiological processes, comorbidity, and treatment response. Going beyond simply cataloging gender-related data, the book explores how the research can guide us in developing more effective clinical services for both women and men. Incorporating cognitive, biological, physiological, and sociocultural perspectives, this is an essential sourcebook and text.

Gender Violence in Russia Sep 19 2019 Just a few years ago, most Russian citizens did not recognize the notion of domestic violence or acknowledge that such a problem existed. Today, after years of local and international pressure to combat violence against women, things have changed dramatically. Gender Violence in Russia examines why and how this shift occurred—and why there has been no similar reform on other gender violence issues such as rape, sexual assault, or human trafficking. Drawing on more than a decade of research, Janet Elise Johnson analyzes media coverage and survey data to explain why some interventions succeed while others fail. She describes the local-global dynamics between a range of international actors, from feminist activists to national governments, and an equally diverse set of Russian organizations and institutions.

Rape and Sexual Assault Aug 23 2022

Handbook of Injury and Violence Prevention May 28 2020 In the Handbook of Injury and Violence Prevention, over fifty experts present the current landscape of intervention methods - from risk reduction to rethinking social norms - as they address some of the most prevalent forms of accidental and violent injury. - Overview chapters examine the social and economic scope of unintentional and violent injury today - Extensive literature review of specific intervention programs to prevent violence and injury - Special chapters on childhood injuries, alcohol-related accidents, and disasters - "Interventions in the Field" section offers solid guidelines for implementing and improving existing programs - Critical analysis of issues involved in delivering programs to wider audiences - Helpful appendices list relevant agencies and professional resources This dual focus on intervention and application makes the Handbook a bedrock text for professionals involved in delivering or managing prevention programs. Its what-works-now approach gives it particular utility in the graduate classroom, and researchers will benefit from the critical attention paid to knowledge gaps in the field. It is a major resource for any reader committed to reducing

the number of incidents just waiting to happen.

Perpetrators of Intimate Partner Sexual Violence Aug 31 2020 Research shows that intimate partner sexual violence (IPSV) is the most common form of sexual assault. Professional focus is often on the victim, but more information is needed about the perpetrators in order to have a fuller understanding of this crime. The very nature of IPSV – sexual assault within a relationship – means that professionals who work with victims must understand the dynamics of perpetrators as well. This new book will distill the knowledge that exists about perpetrators of IPSV. It includes chapters by authors who have worked directly with IPSV perpetrators and covers important subjects such as addressing IPSV in batterer groups, police management strategies, the danger of IPSV to children, the different types of violence perpetrators use, and prevention approaches for young people. There is also still a widely held view that rapists are strangers in alleyways. This book is intended to educate professionals about who is a perpetrator, as well as to highlight the very real danger these perpetrators represent, including a heightened risk of lethality. The contributors look at the social context of IPSV and the implications for prevention and provide hands-on knowledge to practitioners in a number of fields. The book may also be used within the academic context in fields such as social work, sociology, counseling, psychology, medicine, nursing, criminal justice, and law.

The Trauma of Sexual Assault Jun 16 2019 The psycho-social needs of victims of rape and sexual assault are increasingly recognised and there is a need for a critical synthesis of knowledge and practice to support the development of training and best practice in the mental health and sexual health professions. The Trauma of Sexual Assault provides an understanding of the theoretical underpinning of the wide range of clinical problems that can follow sexual assault. Focusing on adult victims of sexual assault, this book brings together research findings, theoretical perspectives and implications for treatment, longer term management, and future policy. 'The first text to consider the psychological impact of sexual assault on women and men' Incorporates a comprehensive flow-through model of psychological and social management from the initial presentation of the assaulted person onwards 'A much needed reference, accessible to a wide range of professionals Part of the Wiley Series in Clinical Psychology Sourcebook on Violence Against Women Nov 21 2019 The Third Edition of the comprehensive Sourcebook on Violence Against Women by Claire M. Renzetti, Jeffrey L. Edleson, and Raquel Kennedy Bergen covers the current state of research, theory, prevention, and intervention regarding violence against women. The book's 15 chapters are divided into three parts: theoretical and methodological issues in researching violence against women; types of violence against women; and, new to this edition, programs that work. Featuring new chapters, pedagogy, sections on controversies in the field, and autobiographical essays by leaders in grassroots anti-violence work, the Third Edition has been designed to encourage discussion and debate, to address issues of diversity and cultural contexts, and to examine inequalities of race and ethnicity, social class, physical ability, sexual orientation, and geographic location.

Stopping Rape Mar 18 2022 This book offers a comprehensive guide to the international policies developed to stop rape, together with case studies on their effectiveness in practice. Engaging with the legal and criminal justice systems, health services, specialised services for victim-survivors, educational and cultural outreach, and more, it brings together both theory and real-world evidence to build a thorough picture of worldwide efforts to fight rape in all its contexts.

Creative Interventions Toolkit Jun 09 2021 The Creative Interventions Toolkit is a practical guide to community-based interventions against interpersonal violence, a process also known as community accountability or transformative justice. Originally an online resource, it is written for everyday people—survivors, people who caused harm, and friends/family who want to help without turning to the police or government. It provides basic information about interpersonal violence; advice for survivors of violence and people who have caused harm; guides for people who want to help; a framework to confront and transform violence; and stories from people who have used community-based interventions.

Understanding Violence Against Women Oct 25 2022 Violence against women is one factor in the growing wave of alarm about violence in American society. High-profile cases such as the O.J. Simpson trial call attention to the thousands of lesser-known but no less tragic situations in which women's lives are shattered by beatings or sexual assault. The search for solutions has highlighted not only what we know about violence against women but also what we do not know. How can we achieve the best understanding of this problem and its complex ramifications? What research efforts will yield the greatest benefit? What are the questions that must be answered? Understanding Violence Against Women presents a comprehensive overview of current knowledge and identifies four areas with the greatest potential return from a research investment by increasing the understanding of and responding to domestic violence and rape: What interventions are designed to do, whom they are reaching, and how to reach the many victims who do not seek help. Factors that put people at risk of violence and that precipitate violence, including characteristics of offenders. The scope of domestic violence and sexual assault in America and its consequences to individuals, families, and society, including costs. How to structure the study of violence against women to yield more useful knowledge. Despite the news coverage and talk shows, the real fundamental nature of violence against women remains unexplored and often misunderstood. Understanding Violence Against Women provides direction for increasing knowledge that can help ameliorate this national problem.

Rape Myths Feb 05 2021 Rape Myths: Understanding, Assessing, and Preventing is ideal for anyone wishing to know more about their theoretical background, prevalence, assessment, and functions. Outlining their meaning and foundations, this book also considers their conceptualisation and the construct of rape myth acceptance.

Responding to Intimate Partner Violence and Sexual Violence Against Women Apr 19 2022 A health-care provider is likely to be the first professional contact for survivors of intimate partner violence or sexual assault. Evidence suggests that women who have been subjected to violence seek health care more often than non-abused women, even if they do not disclose the associated violence. They also identify health-care providers as the professionals they would most trust with disclosure of abuse. These guidelines are an unprecedented effort to equip healthcare providers with evidence-based guidance as to how to respond to intimate partner violence and sexual violence against women. They also provide advice for policy makers, encouraging better coordination and funding of services, and greater attention to responding to sexual violence and partner violence within training programmes for health care providers. The guidelines are based on systematic reviews of the evidence, and cover: 1. identification and clinical care for intimate partner violence 2. clinical care for sexual assault 3. training relating to intimate partner violence and sexual assault against women 4. policy and programmatic approaches to delivering services 5. mandatory reporting of intimate partner violence. The guidelines aim to raise awareness of violence against women among health-care providers and policy-makers, so that they better understand the need for an appropriate health-sector response. They provide standards that can form the basis for national guidelines, and for integrating these issues into health-care provider education.

Trends, Risks, and Interventions in Lethal Violence Mar 26 2020

Preventing Violence in Relationships Apr 07 2021 Annotation Schewe (researcher, U. of Illinois at Chicago) presents 10 contributions by psychologists describing interventions for use in preventing violence in intimate relationships and in families. Theory, research, and practice have been melded in discussion of school-based child sexual abuse prevention, child sexual abuse as a public health concern, children victimized by peers, dating violence education, self-protection strategies for rape avoidance, men's responsibility for preventing sexual assault, prevention of domestic violence, violence and the elderly population, and evaluating prevention programs. Annotation c. Book News, Inc., Portland, OR (booknews.com).

Women and Victimization Jan 16 2022 The authors integrate research from many disciplines on factors that contribute to partner violence and sexual assault victimization, mental health, and substance use among adult women; provide conceptual and research background on why women may interpret and respond to interpersonal victimization very differently; and identify implications for future research and implications for interventions.

Challenges for Humanitarian Intervention Jan 04 2021 Ten new essays critique the practice armed humanitarian intervention, and the 'Responsibility to Protect' doctrine that advocates its use under certain circumstances. The contributors investigate the causes and consequences, as well as the uses and abuses, of armed humanitarian intervention. One enduring concern is that such interventions are liable to be employed as a foreign policy instrument by powerful states pursuing geo-political interests. Some of the chapters interrogate how the presence of ulterior motives impact on the moral credentials of armed humanitarian intervention. Others shine a light on the potential adverse effects of such interventions, even where they are motivated primarily by humanitarian concern. The volume also tracks the evolution of the R2P norm, and draws attention to how it has evolved, for better or for worse, since UN member states unanimously accepted it over a decade ago. In some respects the norm has been distorted to yield prescriptions, and to impose constraints, fundamentally at odds with the spirit of the R2P idea. This gives us all the more reason to be cautious of unwarranted optimism about humanitarian intervention and the Responsibility to Protect.

Cognitive Processing Therapy for Rape Victims Aug 19 2019 Sexual assault is a traumatic event from which many survivors never fully recover. They may develop a range of disorders, including post-traumatic stress disorder, depression, poor self-esteem, interpersonal difficulties and sexual dysfunction. This volume provides insight into the effects of rape and explores a treatment approach that assists in the healing process.

The Rape Crisis Intervention Handbook Jul 10 2021 This handbook is intended to be a comprehensive resource for those involved in providing crisis intervention to rape victims. The medical, legal, and counseling needs of the rape victim are presented to prepare helping professionals to offer sensitive and skillful assistance to women who have suffered sexual assault. The interdisciplinary thrust of the book reflects our conviction that health professionals, police, and prosecuting attorneys must share their expertise and coordinate their efforts in order to successfully meet the multiple needs of rape victims and their families. While an extensive literature on rape has developed in the past decade, to the best of our knowledge there is no single source for the practical treatment-oriented information sought by those who work directly with victims. The primary objective of this book is to offer just such a guide to service providers. The book is organized into sections that deal with a specific area of the treatment of victims. Detailed guidelines are provided for the nursing, medical, counseling, police, and legal services involved in comprehensive crisis intervention. Interdisciplinary teaming and the emotional impact of rape on service providers are discussed by authors actively involved in rape crisis work. Rape laws are explained and court preparation for victim-witnesses is carefully outlined. Of particular relevance to counselors is an overview of crisis theory and a psychodynamic perspective on rape trauma.

Domestic Violence Sourcebook Nov 14 2021 "Provides basic consumer health information about the physical, mental, and social effects of violence against intimate partners, children, teens, parents, and the elderly, along with prevention and intervention strategies. Includes index, glossary of related terms and directory of resources"—Provided by publisher.

The Violence of Care Jun 21 2022 Honorable Mention, 2015 Eileen Basker Memorial Prize presented by the Society for Medical Anthropology Every year in the U.S., thousands of women and hundreds of men participate in sexual assault forensic examinations. Drawing on four years of participatory research in a Baltimore emergency room, Sameena Mulla reveals the realities of sexual assault response in the forensic age. Taking an approach developed at the intersection of medical and legal anthropology, she analyzes the ways in which nurses work to collect and preserve evidence while addressing the needs of sexual assault victims as patients. Mulla argues that blending the work of care and forensic investigation into a single intervention shapes how victims of violence understand their own suffering, recovery, and access to justice—in short, what it means to be a "victim". As nurses race the clock to preserve biological evidence, institutional practices, technologies, and even state requirements for documentation undermine the way in which they are able to offer psychological and physical care. Yet most of the evidence they collect never reaches the courtroom and does little to increase the number of guilty verdicts. Mulla illustrates the violence of care with painstaking detail, illuminating why victims continue to experience what many call "secondary rape" during forensic intervention, even as forensic nursing is increasingly professionalized. Revictimization can occur even at the hands of conscientious nurses, simply because they are governed by institutional requirements that shape their practices. The Violence of Care challenges the uncritical adoption of forensic practice in sexual assault intervention and post-rape care, showing how forensic intervention profoundly impacts the experiences of violence, justice, healing and recovery for victims of rape and sexual assault. Instructor's Guide

Rape Education for Men May 08 2021

A Practical Approach to Trauma Mar 06 2021 A Practical Approach to Trauma: Empowering Interventions provides trauma counselors with effective guidelines that enhance skills and improve expertise in conducting empowering therapeutic interventions. Taking a practitioner's perspective, author Priscilla Dass-Braileford focuses on practical application and skill building in an effort to understand the impact of extreme stress and violence on the human psyche. provides trauma counselors with effective guidelines that enhance skills and improve expertise in conducting empowering therapeutic interventions. Taking a practitioner's perspective, author Priscilla Dass-Braileford focuses on practical application and skill building in an effort to understand the impact of extreme stress and violence on the human psyche.

Crisis Intervention Dec 23 2019 Crisis Intervention is an essential tool for crisis therapy programs. Kenneth France details appropriate interventions for individuals in a variety of crisis situations, including rape and crime victims, natural disaster and terrorist attack victims, persons struggling with domestic and relational issues, those involved in police incidents and hostage situations, as well as suicidal clients and survivors of suicide victims. France highlights the importance of appropriate training for crisis workers and discusses the various methods that are most effective to ensure efficiency and to prevent bu.

Intimate Betrayal May 20 2022 "Every year thousands of women are raped by someone they know and never report the sexual assault, partly because acquaintance rape is still widely misunderstood in our society and victims are often blamed for the crime. Addressing a need to change perceptions about this type of assault, this study informs and educates about the nature of acquaintance rape, its impact on the victim, intervention, and prevention. The chapters on intervention include material on crisis intervention, tools for effective rape counseling, and strategies for meeting the psychosocial needs for survivors who are facing long-term recovery due to previous sexual assault victimization. Survivors vividly describe the events in their own words, bringing home the horror of acquaintance rape and the immediate need for action to prevent it. The authors also offer a special chapter on marital rape to expose this long-denied and insidious form of rape. In addition, a useful review of current literature pinpoints interventions crucial to rape prevention."—From publisher description.

Stopping Rape Dec 15 2021 The need to stop rape is pressing and, since it is the outcome of a wide range of practices and institutions in society, so too must the policies be to stop it This important book offers a comprehensive guide to the international policies developed to stop rape, together with case study examples on how they work. The book engages with the law and criminal justice system, health services, specialised services for victim-survivors, educational and cultural interventions, as well as how they can best be coordinated. It is informed by theory and evidence drawn from scholarship and practice from around the world. The book will be of interest to a global readership of students, practitioners and policy makers as well as anyone who wants to know how rape can be stopped.
